1.The following is an examiner's statement of reasons for allowance: the prior art neither teaches nor suggests, in a method of processing municipal sludge or waste, the aspects of (1) providing municipal waste or sludge in granular form, (2) providing a cement material with the granules, (3) spraying a polymeric additive over the granules to coat them, (4) applying a hydroxyl group in an amount of 20 to 50% of the sludge or waste material, and (5) shaping or stockpiling the coated granules. Note is taken of Downs et al. (5,286,430) which teaches a process similar to that instantly claimed but does not teach coating the granules by spraying them with a polymeric additive.
